Full Reflection: Experiencing and Facilitating Inclusion

Prompt: How have you been part of making everyone feel included this semester?

1. **Answer to the prompt:** This semester, I've focused on making sure everyone feels welcome and part of the team. First, as a second-year junior (J2), I've been greeting and helping the new first-year juniors (J1) settle in. They're from all over, and I want to make sure they all feel at home. Second, as the leader of my project team, I'm working hard to make sure our five-person team works well together. It's my job to make sure everyone gets along and feels part of what we're doing.
2. **Learned/Challenged**: I've learned that making everyone feel included is about more than just being nice. It's about really listening to what everyone has to say and making sure they all feel like their ideas and feelings matter. The tough part is making sure I do this for everyone in the group, no matter where they're from or what they're good at.
3. **Future Implications**: Being good at including everyone is going to help me a lot in the future, no matter where I work. Knowing how to make sure everyone on a team is heard and valued is super important.
4. **Further Learning/Questions**: How can I keep getting better at this? Are there other ways I can make sure everyone in the group feels included all the time?

Lite Reflection: Getting Along with the Project's Client

1. **Prompt**: Are things going well with your project's client?
2. **Learned/Challenged**: Yep, things are great with Eli and Ryan. We've worked together before, and they're awesome at giving us feedback and letting us be creative.
3. **Future Implications**: Good relationships with clients make our projects better and can lead to more cool stuff in the future.
4. **Further Learning/Questions**: How can we keep this good thing going with our clients?

Lite Reflection: Filming of Computer Science Space

1. **Prompt**: What's happening with the documentary about your computer science program?
2. **Learned/Challenged**: We're filming a documentary about our place, which is super exciting. It's a big deal for our program and could help us a lot.
3. **Future Implications**: This film could really help people learn about what we do and bring in support.
4. **Further Learning/Questions**: How can we make sure the interviews really show off the best of our program?
